

Let CID Make Your Decisions Easy

Save Money & Time Through Innovative Design

No Need for Conceptual Drawings

CID can deliver all design ideas to meet customer criteria

- 1 6" triple-pane window system integrates tempered infrared reflective exterior glass pane with 2 interior panes of clear safety tempered glass. Window system is provided with individual removable exterior stops for maintenance and replacement. Window application is designed to reduce both sound and heat wave length propagation.
- 2 Tilted front window sections help reduce glare from operations and improved visual line of sight.
- 3 Pre-installed customer consoles and desks.
- 4 Platforms and safety handrails built into the structural framework.
- 5 Motor control equipment rooms integrated into building layout.
- 6 Raised access flooring finished with high pressure laminate surface. Allows customer to complete cable runs beneath computer floor surface.
- 7 Acoustical ceiling system includes fire rated ceiling tile and grid system.
- 8 Modular building split.
- 9 Load bearing internal walls.
- 10 Air locks to reduce sound, dust, and fume contamination in main control room.
- 11 Comfort station/bathroom incorporated to improve operator work performance.
- 12 Heating and air-conditioning unit installed on roof with the appropriate size ductwork and transitions.
- 13 Control panels and transformers pre-installed.
- 14 Custom logos and paint combinations to meet customer requirements.
