

CID Custom Electrical & Power Control Rooms (PCR's)

Save Money... Selected Equipment Installed By CID

Let CID take your MCC, PLC, Drives, UPS, Computers and mount them on prefabricated supports in CID's manufacturing facility. Imagine the headaches saved by not doing this on-site. The equipment is mounted to the supports and

to the walls of the room and can even be prewired and tested. A built-in impregnable guardrail protects equipment. Unit is engineered, regardless of weight or size, to be lifted from top using crane lifting lugs.

AEG PCR showing racks, cable tray & pull boxes before equipment is mounted and raised access flooring is installed. Total simplicity and complete accessibility.

Iskenderun Iron and Steel Works, Turkey, showing vibrating feeders and snorkel drive controller mounted to wall with PLC and MCC mounted, prewired and tested.

SES MCC control house showing drives, PLC and MCC installed, wired and tested at CID before shipment to site. Less time, no site confusion, equals increased savings.

Unit complete and ready for shipment with all interconnect of controls and bus splices.

Using These CID Concepts, Buildings Have Been Shipped Stateside and Worldwide to:
Turkey • Belgium • Mexico • Brazil • Canada • Indonesia

CID is a Quality Performance System Company (TQM), Member: Association of Iron and Steel Engineers (AISE), Steel Manufacturers Association, Iron & Steel Society and a member of TheSteelAlliance.
